

Multipix Intelligent Systems

**IP Based Security Solution
Provider**

Multipix

Multipix Surveillance Solution

- Multipix's IP-Surveillance technology provides more future-proof and cost-efficient solutions that bridge the technological gap between the analog and digital worlds.
- Multipix's MPweb IP security video management software solutions are ideal for monitoring and managing high-quality video streams over existing computer networks.
- Superior to analog video solutions, Multipix IP-Surveillance means reliable and distributed access or recording of high-quality digital H.264 security video.

Multipix Software

■ 2. Multipix Software

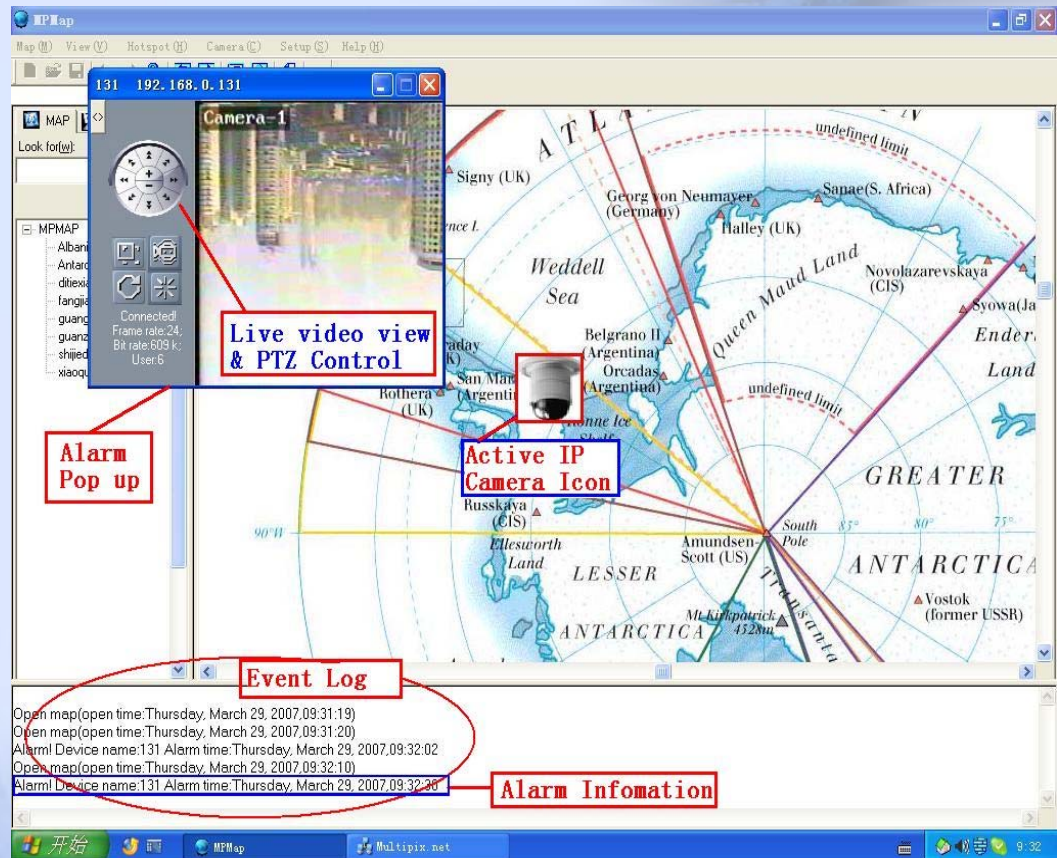

MPweb Video Management Software

- Support 64 IP Cameras for Single PC
- Support various recording
(Alarm-Re/ Schedule- Re/ Motion detect-Re/
Pre-alarm-Re/Manual-Re....)
- Support Dual Screen
- Support Snapshot
- Support dual video streaming
- Support alarm pop-up Video
- Support Camera group management
- Support programming Preset position patrol
- Support fully functional PTZ Control
- Support Bidirectional audio control
- Support user definable digital matrix
- Support unlimited user management level
- Support Video event log

Multipix Software

- **Multipix Digital Map System**
- support unlimited digital map layer:
- support unlimited device link:
- support live video view & PTZ control:
- support map / device search function:
- support alarm popup:
- support event log

Multipix Software

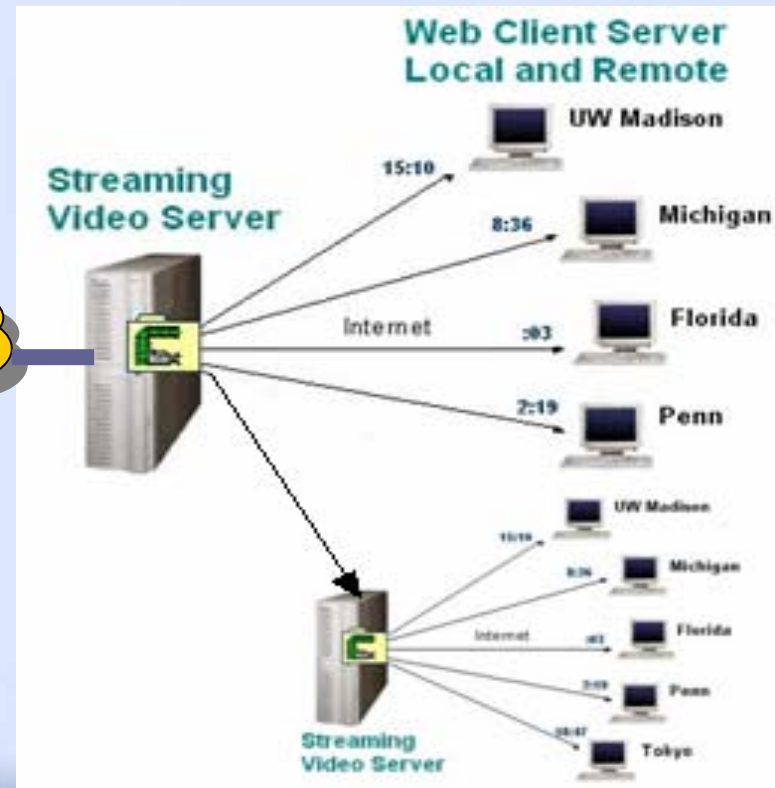

MPXP Multipix Video Streaming Server

- MPXP Video Streaming server can let hundreds users access to Multipix IP cameras Simultaneously.

Multipix IP Cam

Internet

Multipix Software

MP-Matrix Multipix Matrix Software

- Multipix Matrix software can send any video stream in Mpweb Pro to the video matrix.

MPWeb Pro Video manager

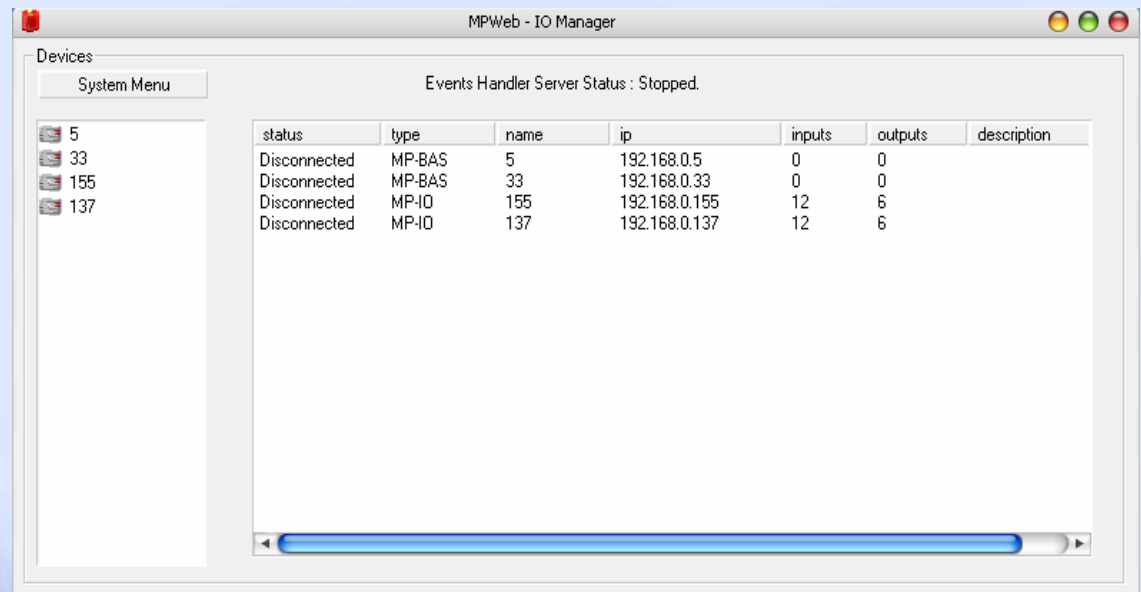

Video Matrix

Video Streaming
Server

Multipix Software

MPIO Alarm Management Software

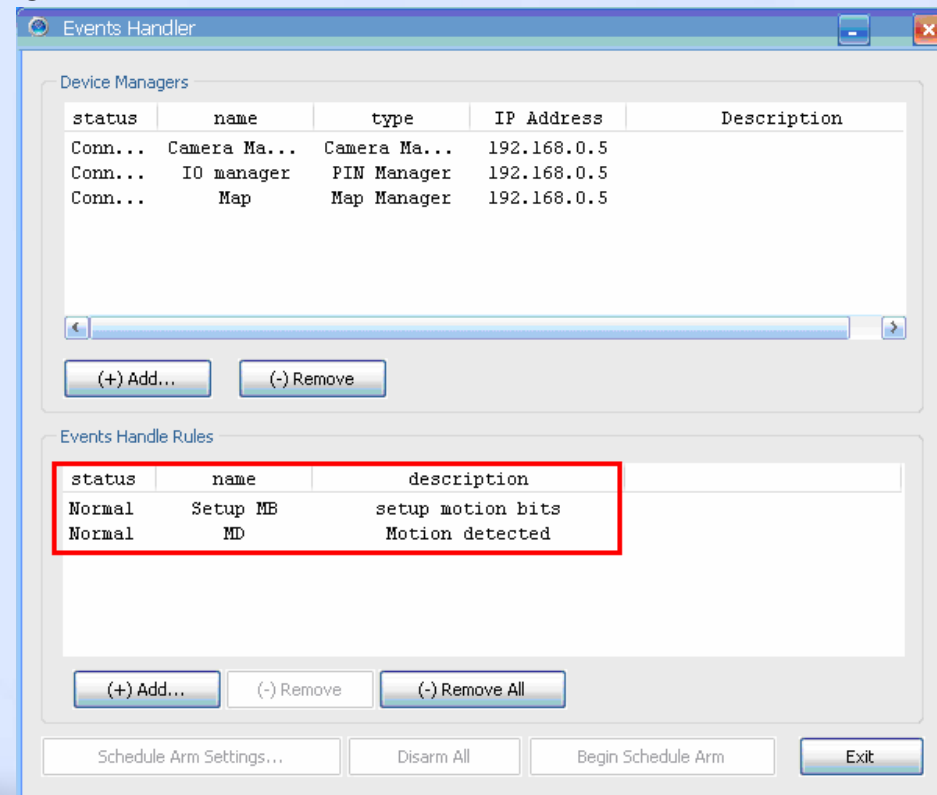

- support unlimited input & output device (via MP-IO box)
- support unlimited temperature & humidity sensors (via MP-BAS)
- support TCP/IP & UDP
- support live graph for temperature & humidity
- support instant device control
- support alarm notification
- support device event log
- support unlimited user management level

Multipix Software

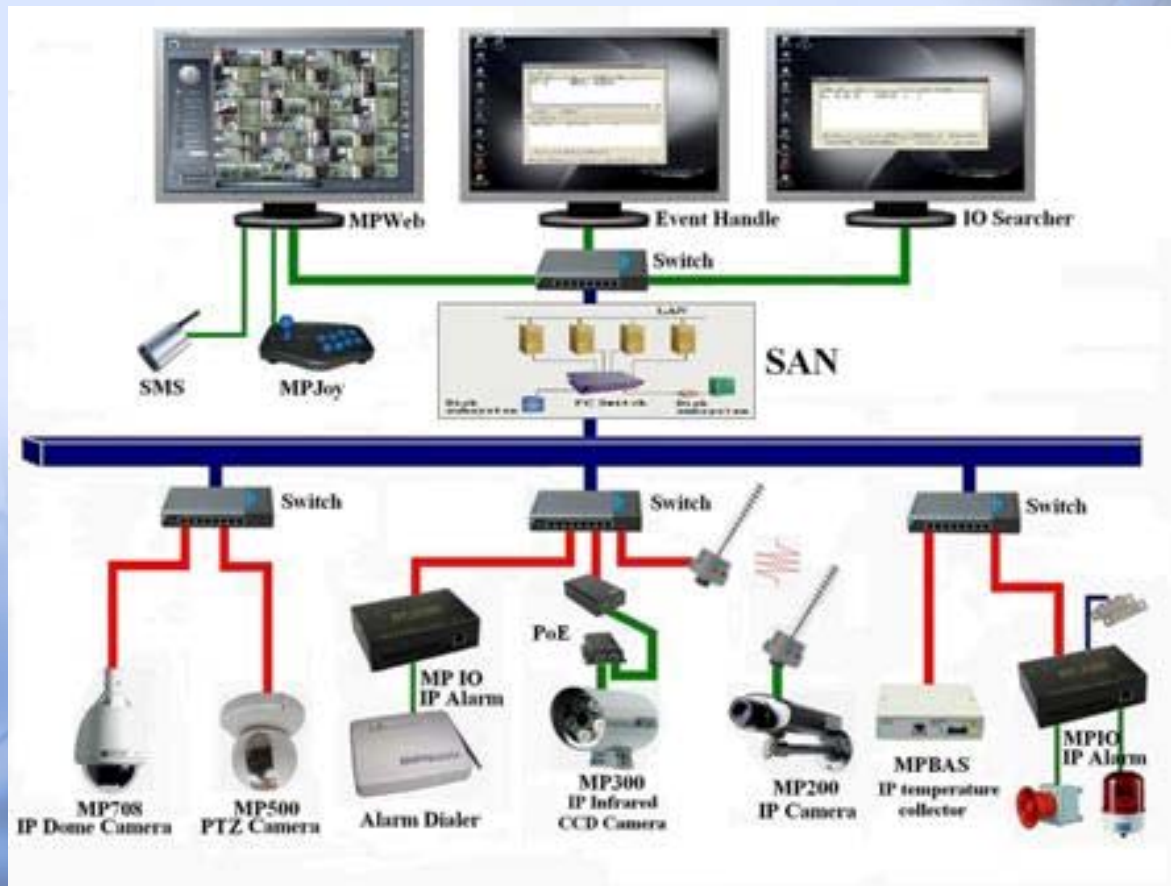

MP-Event Handler Server

- support unlimited MPWEB & MPIO machine
- support unlimited device trigger conditions programming:
- support many to many trigger
- support alarm send email with snapshot function:
- support alarm send SMS function
- support alarm auto phone dial function
- support scheduled arm / disarm function
- support delay arm / disarm function
- support event log
- support unlimited user management level

Multipix Software

MP1000 Architecture

Multipix Hardware

- **The following are the unique features of Multipix Hardware:**
- H.264/MPEG-4 part 10 video compression
- Dual streaming technology
We can view in CIF, the same time record in D 1compression.
- Alarm points: 2 alarm inputs/3 alarm outputs
- Multi-Protocol Supported: TCP/IP, UDP/IP, SMTP, FTP, HTTP
- 802.3af POE Embedded
- Various Camera Hardware Fix Cam, IR Cam, Dome Cam, Speed Dome, High Speed Dome)
